

SAE Financial and Housing Corporation Pictures of Projects

In the web asset “General Design Objectives and Best Design Practices” are several best practices that F&H and the architects have used in our designs to ensure that SAE houses built are competitive with the most advanced dormitory and apartment designs.

Following are several pictures for the Indiana Sigma house, built as a ground-up in 2011, and incorporated most of the design best practices.

Architect rendering of the Indiana Sigma House – Plot Plan
